

BEFORE

Polished concrete is fast becoming the ultimate no-wax flooring material. With our **top-of-the-line** floor grinding equipment and decades of experience, our crews of **highly trained professionals** can grind concrete surfaces, whether new or old, to a high-gloss finish that never needs waxes or coatings. Factor in the **superior durability** and performance of concrete, and it's no wonder why more retail, commercial warehouse and office facilities, and even homeowners are catching on to the appeal of these **smooth, high-luster floors**.

Polished Concrete

AFTER

Northwest Floor Care not only has the concrete flooring knowledge that over **50 years** in the industry brings, but also every tool and machine necessary for every size job. **No matter how large!**

“Easy-to-clean, highly durable concrete makes a fantastic flooring choice for industrial sites, commercial spaces and retail facilities due to its versatile decorative look and cost-effective life cycle.”

Benefits of Polished Concrete

Ecologically Efficient

The structural slab is used as the finish so no other materials are harvested to cover it

Non-Pollutant

Polished concrete installation releases no Volatile Organic Compounds (VOCs), therefore does not emit airborne contaminants

Reflectivity

The reflective surface brightens the facility and reduces the need for artificial lighting

Cost Effective

The durability of polished concrete combined with its enduring life cycle make it one of the most cost-effective flooring solutions available

Versatility

Polished concrete can be designed in any color, sheen, or aggregate exposure to work with any decor

Low Maintenance

Polished concrete is easy-to-clean and doesn't require stripping and waxing like previous retail floor systems

Highly Durable

True polished concrete doesn't rip or scuff because there is no topical coating on the surface and it holds up to high traffic and abuse

Allergen Free

Polished concrete harbors no dust-mites, dander or mold
